OUR BRANDS

North America's largest producer of shopping carts, material handling carts and various other wire and tubing products.

French Company provides retail equipment maintenance and repair as well as facility assessment and repair.

TECHNIBILT® SHELVING SYSTEMS

Technibilt Shelving Systems(TSS) provides storage, display and transport solutions for today's retail, industrial/commercial, foodservice and healthcare markets.

NEW PRODUCT

Built-in antimicrobial protection inhibits the growth of bacteria, mold and mildew on the shelf liners, providing a cleaner worksurface for various applications.

SmartCell delivers industry-leading open wire storage that allows for easy identification of materials. Quickly adjustable storage compartments increase the efficiency of both materials management and nursing staff alike.

TECHNIBILT SHELVING SYSTEM

Is Recognized For Quality And High Strength. All Welded Construction And Truss Configuration Adds Significant Strength Characteristics To Each Shelf Size.

NO TOOL ASSEMBLY

The assembly process is simplified with the Split Conical Adapters which snap into the grooves on the post. The shelf slips over the top surface securing the shelf and adapter to the post. 4 corner adapters are included with each shelf.

CAPACITIES

Weight Capacities Per Shelf (Evenly Distributed)

Length	Capacity	Length	Capacity
24" - 48"	850 Lbs.	60"	750 Lbs.
54"	800 Lbs.	72"	700 Lbs.

FINISHES

Chrome Plus (CH) - Our answer to high visibility and dry storage areas. The heavy nickel plate process features a hard chromium finish with special brighteners to enhance and increase the life of the shelving. This finish is a replacement for zinc and standard chrome products. (1 year warranty against rust - pro-rated)

Duro Seal (PW) - The process provides a metalized zinc chromate plating with a special formulated hard hybrid silver/gray finish which is bonded to the plated metal surface. Duro Seal can be used in high humidity storage applications such as walk-in coolers and freezers. (16 year warranty against rust - pro-rated)

Black (BLK) - The black powder coating is electrostatically applied to cold rolled steel, creating a light duty finish ideal for use in an office environment or retail point of purchase display.

TECHNIBILT LAYOUT & DESIGN CAPABILITIES

Layout and design assistance is available for your large and small projects alike. Whether it be one cart/shelving unit or a new hospital construction project, we can support your design needs with 2-D and 3-D renderings. With your assistance, we'll develop a complete storage system centered around your storage requirements and workflow needs. We'll most effectively utilize the available space with the appropriate product mix consisting of:

- + Baskets
- + Hi-Density Mobile Track Systems
- + Wire Shelving
- + Wall Systems

Security cages are an ideal method for storing and transferring costly materials and items subject to pilferage. Open wire construction (2" x 2") allows for visibility into the unit, so items can be checked at any time. Casters can be added for mobile applications. A dolly base and plate casters are available for heavy-duty transport applications.

CART COVERS

Our covers are offered in a variety of materials including: Tech-Chek Vinyl, ESD Vinyl, 400 & 200 Denier Nylon, Spun-Filament Polyester, 12 Gauge Clear Vinyl and 20 Gauge Clear Vinyl.

CART COVER MATERIAL

Tech-Chek Vinyl: 10 oz. per square yard reinforced Vinyl. Fabric qualities include: Flame Resistant, Stain/Tear Resistant, Antistatic, Odor Resistant, Fluidproof, Antimicrobial, Easy to Maintain.

12 Gauge Clear Vinyl: 12 Gauge Clear Vinyl is marine grade, mildew resistant and UV stabilized. Allows for easy viewing of cart's contents.

ESD Vinyl: 10 oz. per square yard reinforced Vinyl with special anti-conductive properties. Fabric qualities include: Fluidproof, Antimicrobial, Flame Resistant, Stain/Tear Resistant, Electrically Conductive, Hypoallergenic, Self-Deodorizing, Easy to Maintain.

200 Denier Nylon: Medium weight, flexible. Best for stationary carts.

400 Denier Nylon: Heavy weight alternative to 200 Denier. Good for stationary or moving carts.

400 Denier Nylon Colors Include:

FEATURES / OPTIONS

Standard Features Include: Full Flaps, Reinforced Corners, Velcro® Tab or Zipper Closures, 12 Point Inspection, and Double Needle Construction.

Available Options: Hand Hole(s), Handle Hole(s), Velcro® Strip Closures, Clear Vinyl Front Flap, 9" x 12" Clear Routing Pocket, Top & Bottom Tie Tapes, Side Flaps, Linen Pocket, Clear Vinyl Windows, Custom Screen Printing and Stenciling.

How to Design Your Cart Cover:

1. Accurately measure width, length and height (do not allow for clearance, give exact measurements, height to above casters).
2. Determine corner style. (round end, round front or square)
3. Determine fabric and color.
4. Determine flap closure. (velcro or zippered)
5. Indicate any special options.
6. Make a simple illustration, if needed.

ACCESSORIES

5 SIDED SHELF

Put unused corner space to work for you. Our (5) sided shelf provides easier access to stored articles in corner spaces, removing the typical start/adder configuration. Shelf sizes correspond to depth of shelving for additional storage sections to be added.

TECHNIBILT HD SYSTEM

Technibilt High Density moveable aisle system increases the storage capacity of a given area by 40-50%. Our versatile system allows for more storage units to be installed in a defined space, preventing the need for expansion or renovation of existing storage areas. An open, moveable aisle (usually 36") allows access to each level of each shelving unit, eliminating dead or wasted spaces.

VTrack with Endstop

VTrack Profile

Skate With Wingkit

Maximizes Storage Capacity

+

Increases Productivity

=

Cost-Saving Performance

Technibilt HD System uses a skate concept, utilizing the structural integrity of the Technibilt Storage Systems(TSS) shelving units.

The low-profile, non-corrosive aircraft aluminum track measures 7/16" at its highest peak, allowing for easy cleaning and ADA compliance. Floor tracks provide a smooth, level surface, when inconsistent or uneven floor conditions exist.

Industrial-type bearings allow loaded units (up to 1,500 lbs.) to glide effortlessly over the track.

COMPONENTS

Skate

Mounting Provisions

End Stop

Components

VTRACK - V-Groove Track - is fabricated from extruded, anodized aluminum and stainless steel, offering corrosion-free construction. Track is sold on a per inch basis to maximize available storage areas.

ESTOP - End Stop Kit - Kit includes 2 ends and 1 drill bit. Positioned at both ends of each track. Serves the dual purpose of stopping the skate/shelving unit and is also the anchor point for the track run.

WINGKIT - Includes 1/4" thick plates and all mounting hardware. Allows for the joining of two units, side by side, sharing one track.

HEAVY DUTY SKATES - Technibilt's skate concept utilizes the structural integrity of our TSS shelving. Each skate is constructed from engineering plastic, aircraft aluminum and industrial bearing.

SKATES

PART #	DIMENSIONS

V-TRACK

PART #
VTRACK

WING KIT

PART #
WINGKIT

Stationary units at the end or center of a high density system are not a requirement for our track shelving system. VTRACK can run the full width of system provided at least one aisle space is allowed.

SINGLE UNIT TRACK SYSTEM

SINGLE DEEP FLOOR TRACK ASSEMBLES

DOUBLE UNIT TRACK SYSTEM

DOUBLE DEEP FLOOR TRACK ASSEMBLES

WAYS TO ORDER

1. Select desired length of track and if you require a single or double unit track.
2. Select corresponding skate size. Skate size should match depth of unit.
3. Determine how many units will fit onto track, allowing for a recommended 30" - 36" aisle.

SMART CELL™

SmartCell™ delivers industry-leading open wire storage that allows for easy identification of materials. Quickly adjustable storage compartments increase the efficiency of both materials management and nursing staff alike.

- Hospital-grade chrome plating prevents sharp edges on open wire mesh baskets.
- Wire mesh baskets prevent the accumulation of dirt and debris, leading to better aseptic practices.
- 12" and 18" Fine mesh wire baskets come in lengths of 18" and 36" suitable for mounting on louvered panels or cantilever pedestal frame.
- Four different adjustable dividers provide endless variations to storage space and also creating opportunities to implement lean inventory management practices, such as KanBan and PAR level systems.
- Pedestal frames and louvered panels are finished with industrial strength powder coat to enhance the durability and longevity of the finish.
- Bottom dust shelf/cover provides a barrier and protection to bottom basket contents, maintaining joint Commission standards.
- Full-length label holders are available, as well as our snap and release label holder that provides color-coded storage options for various departments.
- Optional mobile bracket attaches to pedestal frame and allows the units to be moved for cleaning maintenance or relocation.

FEATURES

CASTERS

Casters are mounted to ¾” steel bar, to provide a larger footprint and prevent units from becoming top-heavy. Med-Glide Plus casters resist oxidation and rust, due to their fiber reinforced plastic structure. They require no maintenance for optimum performance and reliability. Caster size is 4” x 1 ¼” with a weight capacity of 330 lbs. for static loads and 200 lbs. for dynamic loads.

CONSTRUCTION

Cantilever leg frames are constructed from 1” x 2” boxed steel and finished in a cool gray powder coat. The rectangular uprights are notched and numbered at 1” increments to accept the basket hang bar.

BASKETS

The basket hang bar connects to each upright, providing added security and extra weight capacity over the traditional basket mounted end supports. Baskets are available in fine mesh with ½” square openings and a medical-grade nickel chrome finish.

SOLID SHELVES/DUST COVERS

Solid shelves/Dust Covers are constructed from solid, powder coated steel and feature turn down edges to provide additional rigidity.

LOAD CAPACITY

Carts are rated at 100 lbs. per basket, but total cart capacity should not exceed 500 lbs. Weight capacity should be evenly distributed along each basket, as well as the unit as a whole.

6 BASKETS

*SHOWN AS 36” STARTER & 18” ADD-ON

SmartCell® Unit comes complete with 1 single-sided frame, solid bottom dust shelf, 3 (12” deep) baskets, 3 18” deep baskets and 6 frame-mounted basket hang bars.

Add-on units have only 1 frame upright.

*Mobile brackets and optional accessories sold separately on page 38-40.

TECHNIBILT WARRANTY

Equipment Warranty

Technibilt equipment is warranted to be free from defective material and workmanship under normal use and service for a period of one (1) year from date of shipment to the initial customer. During this period, Technibilt will repair or replace at its option without charge, FOB plant of manufacture, the equipment or any part thereof when factory inspection discloses to be defective. Shipments of defective material for repair must be sent prepaid. All export taxes, fees and duties occurring from warranty shipments beyond the continental United States will be the customer's responsibility.

Limited Warranty

Technibilt's finish- CHROME (CH) is warranted against the spread of corrosion or rust for a period of one (1) year from purchase date by the initial owner and is prorated.

Technibilt's finish-Duro Seal (PW) is warranted against the spread of corrosion or rust for a period of sixteen (16) years from the purchase date by the initial owner and is prorated.

The above warranties will be honored based on the following conditions:

- The equipment should be cleaned with only mild detergents.
- The use of abrasive materials (i.e.: stiff brushes or scrapers) will invalidate this warranty, as will physical damage rupturing the coating, or sustained exposure to corrosive substances and vapors.

Technibilt, Ltd. shall not be responsible for : (a) any consequential or incidental damages of any nature whatsoever; (b) normal wear and tear; or (c) the cost of outside labor for removal of defective component parts, except as to be authorized by Technibilt, Ltd. in writing. All component parts claimed to be defective must be retained for inspection by Technibilt, Ltd. which reserves the right to require that such parts be shipped back to its factory, warranty service department or other location designated by Technibilt, Ltd.

This warranty shall not apply to:

- (a) products altered or repaired by other than authorized service representatives or with other than Technibilt, Ltd. replacement parts; (b) products subjected to misuse, abuse or neglect; (c) products damaged by improper use or applications or (d) products that have not been properly maintained.

Written notification of claim under this warranty must be received by Technibilt, Ltd.'s warranty service department, Technibilt, Ltd. PO Box 310 Newton, NC, 28658, within thirty (30) days after the appearance of the claimed defect. Such notification must provide all pertinent information regarding the claim.

No cause of action or claim may be asserted unless it is covered by either one (1) year limited warranty or of sixteen (16) year limited warranty.

Technibilt, Ltd. makes no other warranties other than foregoing, which is in lieu of all warranties, express or implied, including but not limited to ay warranty of merchantability or fitness for a particular purpose.

TERMS & CONDITIONS

Acceptance

All orders are subject to acceptance of terms and conditions of sale, regardless of the form in which submitted. All orders are subject to price prevailing at date of shipment and are quoted F.O.B. Newton, North Carolina. Custom manufactured products may be subject to a deposit at the time of order.

Order Confirmation

To avoid duplication of shipment the word “CONFIRMATION” or “CONFIRMING” should appear on all documents which are sent to confirm orders placed by telephone, fax or any other way.

Terms

No Minimum Order Requirements. Terms are Net 30 days (subject to credit approval). A service charge of 2% per month will be assessed on past due accounts.

Shipments

Shipments will be made F.O.B. shipping point and the buyer assumes responsibility for all damages in transit.

Unless a preferred routing is specified at the time of order, shipment will be made the best way, transportation prepaid and added to invoice.

Damages and Claims

ORDER INSPECTION AND VERIFICATION

Any claims for shortages or damages suffered in transit are the responsibility of the buyer and shall be submitted directly to the carrier. Shortages or damages must be identified and signed for at the time of delivery. Each shipment has a bill of lading and a packing list. The bill of lading identifies the total number of cartons or pieces and the packing list identifies the individual items shipped. Before signing for a delivery, it is the customer’s responsibility to inspect the delivery for correct item count and condition.

Look for the following:

- Torn or punctured boxes or shrink wrap
- Broken or crushed corners
- Broken pallets
- Stacks that shifted on the pallet
- Verify that the packing slip matches the items received in the shipment

EXTERIOR AND CONCEALED DAMAGES

If there is visible damage, the shipment should be refused and the delivery receipt should be marked “refused due to damage.” If an order shows rough handling, it is the consignee’s right and responsibility to inspect the merchandise prior to signing the delivery receipt. Occasionally, damage is not discovered until after the carrier has departed. Upon finding concealed damage after delivery, notify the carrier immediately to address the issue and file a claim. All packaging material should be saved for a follow up inspection by the carrier.

SHORTAGES

All shortage claims must be brought to Technibilt’s attention within five (5) business days from date merchandise is received. Please be certain that you receive the number of packages signed for. Again, the bill of lading identifies the total number of cartons or pieces and the packing list identifies the individual items shipped. Before signing for a delivery, it is the customer’s responsibility to inspect the delivery for correct item count.

Returned Goods Policy

1. All returns must be authorized.
2. Each request must include the following information:
 - A. Customer name and address.
 - B. Invoice number.
 - C. Invoice date.
 - D. Customer P.O. Number.
 - E. Quantity, catalog number and description of item.
 - F. Reason for return.
3. Upon receipt of your request, a return authorization number will be issued and this must be clearly referenced with your return.

TERMS & CONDITIONS

4. The return shipment must be coordinated with a customer service representative, who will advise the proper mode of transport for the return.

5. All returned goods may be subject to a flat 20% handling charge based on state, condition of goods and reason for return.

6. Returns will not be authorized for the following:
- A. Items purchased on a “special order” basis (unless original vendor will accept the return).
 - B. Items that are custom manufactured.
 - C. Partial units of sale.
 - D. Items without original packaging material.

7. Returns must be prepaid and within 60 days of original shipment.

Specifications

All dimensions and shipping weights are approximate. Technibilt reserves the right to change specifications or substitute products of equal specifications without notice. The Company also reserves the right to cease manufacturing or distribution of any product without notice. Manufacturer’s specifications and prices subject to change without notice.
